Dear Parent / Carer

Re: Academic Year 2021-22 - Height and weight checks for children in Year 6

Measuring the height and weight of children in Year 6 is part of Public Health England's National Child Measurement Programme. Essex Child and Family Wellbeing Service is contracted by Essex County Council, on behalf of Public Health England, to undertake these checks in your child's school.

Our trained Healthy Family Support Practitioners will be visiting your child's school to undertake these measurements. Children are measured fully clothed, except for their coats and shoes. All our staff have undergone Safeguarding Children training and are Disclosure and Barring Scheme (DBS) cleared. The programme will be delivered following COVID-safe guidance.

Maintaining the well-being of children in the NCMP

The wellbeing of children and families is very important. Measurements are conducted in a sensitive way, in private and away from other children. If your child's measurements are within the expected parameters, you will not hear from us. If your child is outside the expected parameters, we will contact you with the results and discuss services available in your local area. It is your choice if you share the information with your child. Once screening has been completed, you are very welcome to request a copy of your child's height and weight measurements for your own records.

The emotional impact of the NCMP has been researched and studies show that body image, self-esteem, weight-related teasing and restrictive eating behaviours do not change as a result of being measured or receiving feedback.

The information we collect and what it is used for is listed below:

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets held by NHS Digital and

Department of Health and Social Care may also be linked as this would let us add information from health and education records, where lawful to do so, to understand how and why the weight of children is changing, and how this affects children's health and education and how we can improve the care children receive. This includes your child's health data relating to;

- their birth, hospital care (including time in hospital and out-patient appointments and diagnosis of medical conditions)
- mental health
- social care
- primary care - includes all healthcare outside of hospital such as GP and dental appointments,
- public health - including data relating to preventing ill health such as immunisation records
- records for when and the reason why people pass away
- medical conditions such as cancer, diabetes
- health, lifestyle and wellbeing surveys that your child has participated in
- your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England
- your telephone number is required as we may contact you by telephone to discuss your child's results and offer you further support following your child's height and weight measurement.

All the data collected is also used for improving health, care and services through research and planning.

All this information is treated confidentially and held securely. No individual measurements will be given to school staff or other children.

How the data is used

All the information collected about your child will be sent by us to NHS Digital. NHS Digital is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

The information collected about your child will also be shared by NHS Digital with Public Health England but in a de-personalised form only. This means Public Health England will not be able to identify your child. Public Health England is responsible for working to protect and improve the nation's health.

Both NHS Digital and Public Health England will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS Digital or Public Health England that identifies your child.

De-personalised information from the National Child Measurement Programme may also be shared by NHS Digital with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS Digital only ever shares information for research with the approval of an independent group of experts.

Withdrawing your child from the National Child Measurement Programme

- **If you are happy** for your child to be measured in **Year 6** you do not need to do anything.
- **If you do not** want your child to take part in **Year 6**, or if you have any questions, please contact us within the next seven days on the above number. Children will not be made to take part if they do not want to.

If for any reason the child cannot make the initial appointment, another will be arranged at a later date.

Feedback

We have included our website address: www.virginicare.co.uk/feedback which will take you directly to our Friends and Family feedback website where you will be able to feedback your thoughts and comments on our service, please use service code **E0001**.

Yours sincerely,

Elizabeth Kingsford,
NCMP Portfolio Lead
